RONALGROUP

RONAL Bathrooms

The art of modern bathrooms

RONAL Bathrooms, la nuova divisione bagno di RONAL GROUP, definisce nuovi standard per il mondo del bagno e delle soluzioni wellness. Il marchio RONAL Bathrooms raggruppa quattro realtà che condividono la stessa passione per la tecnologia, l'artigianato, l'innovazione e il design, con particolare attenzione alla massima qualità. La nostra missione è quella di creare un'esperienza bagno e benessere unica per i nostri clienti.

Soluzioni doccia personalizzate, a marchio RONAL e KUDOS, funzionali, moderne, di alta qualità e design sono il fulcro della competenza di RONAL Bathrooms. Gli eleganti mobili da bagno a marchio KAROL e i prodotti wellness a marchio GLASS 1989, prodotti e progettati in Italia, arricchiscono e completano l'esperienza benessere e lo spazio bagno.

 **RONAL**

RONAL offre un portfolio completo di soluzioni doccia contemporanee e di qualità con chiusure, colonne e piatti doccia adatti a ogni tipo di bagno. Realizzate per il benessere, le soluzioni doccia RONAL mirano alla perfetta combinazione di funzionalità, comfort e design.

 **glass**
1989

GLASS 1989 è specialista del benessere e del relax con le sue soluzioni wellness di alta gamma. La sua offerta è completa, caratterizzata da un inconfondibile design italiano: spa per uso indoor e outdoor, saune, hammam, docce multifunzionali, vasche idromassaggio e vasche da bagno di design. Glass 1989 regala un'esperienza di benessere assoluta, sia che si tratti di uso domestico che di utilizzo professionale.

Karol

KAROL ha sempre valorizzato l'artigianalità italiana con un'attenzione particolare rivolta a un design contemporaneo e ad elevati standard qualitativi di produzione. Specializzato in mobili da bagno eleganti e di alta gamma, il marchio offre anche vasche e lavabi. Tutti i prodotti KAROL sono progettati e realizzati in Italia.

 **KUDOS**

KUDOS, marchio britannico produttore di chiusure, cabine e piatti doccia high-end, combina design innovativo e tecnica eccellente nelle sue soluzioni per la doccia.

INFINITY

Born from the combination of an OF Spa and a Portable Spa, it is a panelled overflow spa that can be installed without any dedicated technical compartment, because it houses the entire system below the spa shell.

A wellness experience that comes with an extremely easy installation makes this spa truly special.

It combines the emotion given by a total immersion in water, typical of the OF Spa, with the much appreciated simplicity and practicality of a Portable Spa.

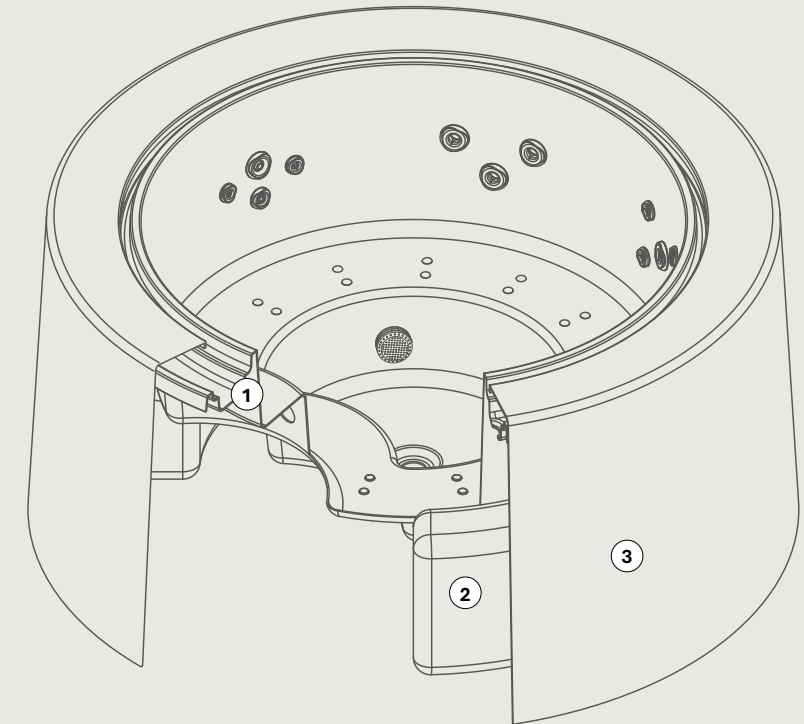

Overflow portable spa

Infinity has nothing to envy to a classic overflow Spa: not only it keeps its characteristics and performance unchanged, but it has also the advantage of not requiring additional technical compartments: it is therefore an ideal choice for domestic use and for semi-professional situations where the space do not allow to host Spa-Pack and compensation tank.

Models included in the range, one circular and one rectangular, can accommodate 4 or 5 people and allow you to share moments of relaxation and a unique and exciting immersive experience.

The overflow channel is hidden by the rim of the panel, to enhance the beauty and design of the product and, at the same time, to become a support point for entering and exiting the spa. Water that overflows into the channel is collected in compensation tanks positioned under the shell, which ensure the continuous topping up of water to keep the water level constant.

PORTABLE SPA

This versatile spa suits all your needs, it is quick and easy to install and does not require any special plumbing systems or dedicated technical compartments. Just fill the spa with water, connect it to the power grid and enjoy all the benefits it offers.

An electronic control panel is installed on the rim of each Portable Spa with an intuitive, easy-to-use functions menu: you can set the hydromassage, chromotherapy and water temperature you want, in just a moment.

Escape and MySpa: the positions of well-being

Every ergonomic MySpa and Escape seat is fitted with different jets of various intensity, positioned to stimulate and relax specific parts of the body.

By changing the combinations of jets in the seats, you can relax with a soft, soothing massage, or be rejuvenated with a toning, destressing massage. Nozzles of the same size can be interchanged, so seats and massages can be customized to your personal needs.

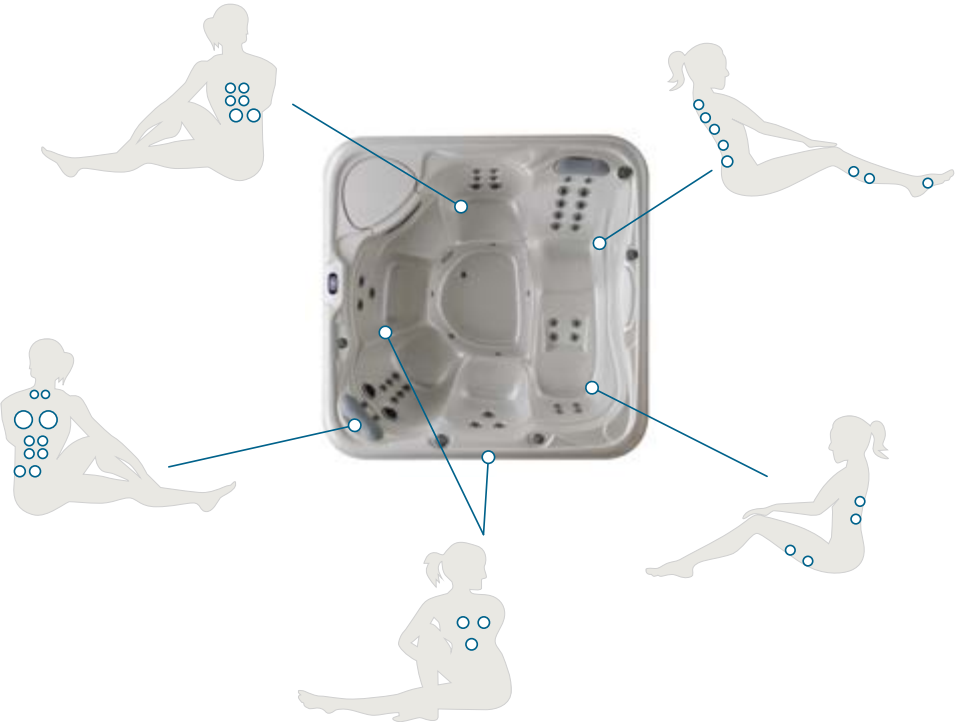

Neck, shoulders and dorsal muscles
Targeted massage, focused on the points where stress is usually felt most.

A massage that is focused on the neck and trapezius muscles can relieve the tension caused by a sedentary job or by frequent car and airplane journeys.

Feet, calves and thighs
Thighs and the lower part of the legs benefit in particular from the mild massage of these jets.

General massage
Jets located on the bottom of MySpa produce a delicate swirling massage.

Hygiene, always

Whether your spa is used for domestic or professional purpose, keeping the water clean is an essential requirement.

The large filtering surface (up to 25 m²) of the cartridge filters installed on our Portable Spa ensures the water is cleaned quickly and effectively. All Portable Spa models can, alternatively, be equipped with a sand filter, which provides superior filtration. The internal shape of Spa also allows the spa to be emptied completely, making it easier to clean and do routine maintenance.

Heat exchanger

As a standard our Portable Spas are equipped with an electric heater.

As an alternative to the heater, it is possible to order the heat exchanger which, by connecting to an external heat source, allows the water in the Spa to be heated more quickly, optimising costs.

MYSPA Care

The kit includes all necessary products for Spa care and maintenance and for water treatment.

Contains: CleanFilterPool, ClorPool, NoAlgae, NoFoam, pH-Down, WaterTester.

Comfort

Our Spas are always ready to use: the system automatically keeps the water temperature constant. The water remains in the pool for long periods of time and is always cleaned and sanitized thanks to the automatic filtration and the kit for water maintenance (MySpa Care).

The only time you need to completely empty the Spa is when it is not going to be used for a long period of time.

Control panel

MySpa and Escape are equipped with Balboa electronics and control panel.

The compact control with simple and easy functions makes using the Spa even more enjoyable: it allows to switch on the Spa, to control temperature regulation and to turn on chromotherapy.

BALBOA 500S
on MySpa 216/165, 215 and 228
Escape 18, 19 and 21

BALBOA 600
on Escape 20

Bluetooth

The optional Bluetooth audio, fitted with two hidden loudspeakers on MySpa and Mawi Spa models, and with two loudspeakers installed on panels on Escape models, enables you to use your own audio device for high quality sound.

Chromotherapy

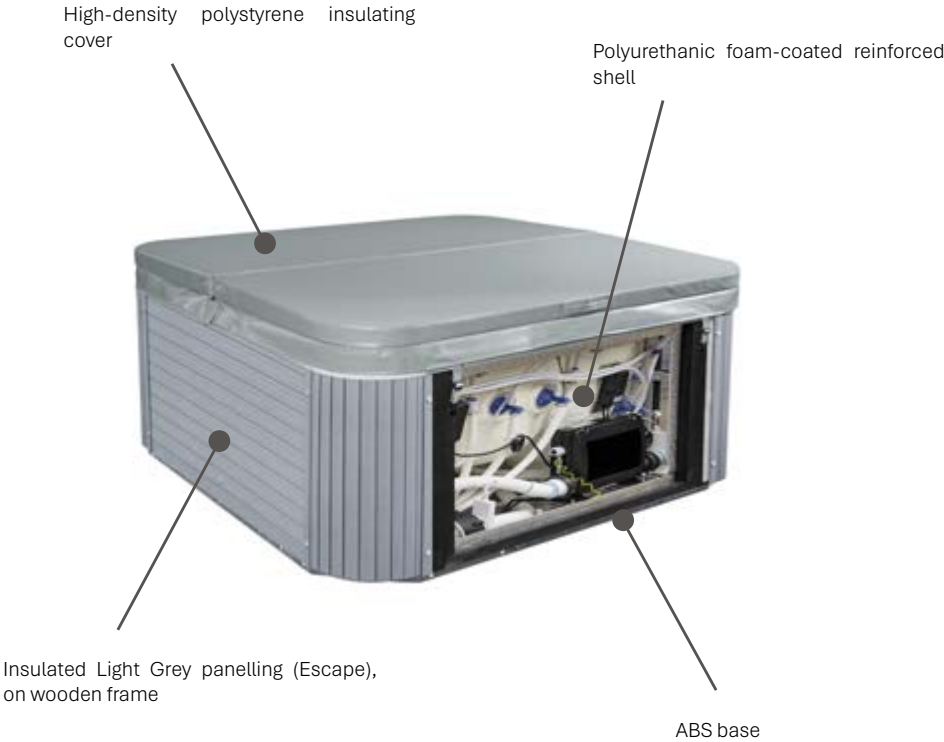

According to colour therapy, colours help to restore the natural balance between body and mind by working on the emotional aspect. Warm colours are associated with positive feelings, with the idea of warmth and stimulation; while cool colours are associated with feelings of peace of mind and comfort.

On MySpa, Escape and Mawi Spa wellbeing is completed with the chromotherapy function with 8 colors and 4 preset programs. Only on Escape models, In combination with chromotherapy operated with a traditional underwater spotlight, an emotional chromotherapy illuminates the water surface, promoting relaxation and increasing psychophysical well-being.

Long-lasting wellbeing

The materials used on our Portable Spas provide optimal thermal and acoustic insulation, reducing energy consumption and impact on the environment. On MySpa and Escape models the ABS base protects the product from infiltration and external agents while the reinforced, polyurethane foam-coated shell in combination with the waterproof, high-density polystyrene insulating cover provides significant energy savings by limiting heat loss.

The steel structure of Portable Spas not only makes installation easy, it also guarantees solidity and durability over time. On MySpa and Escape models the wooden perimeter structure keeps vibrations to a minimum and the sound-absorbing panels on sides and on the bottom help improve sound insulation, making the whole spa experience even more enjoyable.

Insulating cover

The insulating cover helps keep warmth, prevents the filters from premature wear and tear and protects Spas from leaves, insects and impurities. Our Spas are designed to last, thanks to the top materials and technologies used in their construction which are certified for their strength and safety. As optional is available a cover lifter, an accessory for easy removal of the insulating cover; it allows to place it on the side of the spa.

Outside steps

The outside steps, available in the same finish as chosen panels, make entering Escape and MySpa models safe.

Escape steps in Light Grey, in the same finish of the panels.

MySpa steps, available in the same finish of the panels.

ESCAPE

Discover the pleasure of getting away the daily routine and enjoy a moment of relaxation with Escape.

Nozzles

3 jets, different in type and intensity, which are combined to offer focused massages on different areas of the body.

Direct jets

Adjustable nozzle with fixed jet of minimum, medium and maximum intensity: ideal for an invigorating and highly personalized massage

Double Roto jets

Nozzle with dual rotating and pulsating jet, ideal for a gentle massage to relax shoulders and back.

Single Roto jets

Nozzle with single rotating and pulsating jet of different intensities. Ideal for a dynamic massage with an anti-stress effect.

Escape 18

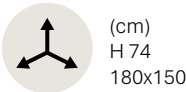

Portable spa which, despite the compact dimensions, can accommodate up to 4 people, offering 4 different massage seats.

MYSPA

Just fill with water your MySpa and connect it to the power grid to enjoy your personal wellness moment.

A stylish design

Glass 1989 MySpa collection introduces panels characterized by high performances and contemporary finishes: these panels, made in a PlyLite version, suitable for outdoor use, are resistant to weather and temperature change, they are anti-mould, anti-bacterial, and they have very good insulating properties. There are four different panels available, three in a wood-effect finish and one in matt gray color, letting you choose the finish that best integrates with your home interiors or with the style of your outdoor space.

Nozzles

Target

Adjustable nozzle with fixed jet of minimum, medium and maximum intensity: ideal for an invigorating and highly personalized massage.

MAWI SPA

With Mawi Spa collection the spa pool becomes a real furnishing element, a relax oasis, perfect both for indoors and outdoors. Mawi Spas are portable spas with contemporary design, which combine aesthetics and functionality, a new way to imagine comfort in the spa world.

Multifunctional wellness

Mawi Spas are equipped with a state-of-the-art and extremely quiet recirculation system, which makes the range perfect for indoor use.

Skimmer with cartridge filter combines optimal performance and compact dimensions, maximizing the internal space of the spa pools.

Concealed thermostatic mixer allows rapid filling of the spa at the preset temperature: relaxation is guaranteed thanks to the automatic filling-up system, which keeps the water level constant for total well-being.

Floor-standing version with panels is enriched with an emotional perimeter light, which creates an intimate and relaxing atmosphere in the room.

Mawi Spas are equipped with white whirlpool and airpool jets, perfectly integrated into the tub, to enhance its cleanliness and minimal aesthetics.

Thanks to the Bluetooth audio kit it is possible to listen to the music playlists collected in your device.

Panels

When installed floorstanding, Mawi Spa contemporary look is enriched by exclusive Ecoresina panels that give to the Spa a new comfort and plenty of color options.

Neve

Polvere

Cenere

Ardesia

Ecoresina panels are available in 4 trendy colors: Neve, Polvere, Cenere and Ardesia. These panels have an external eco-friendly finish, made of state-of-the-art special resins that combine an original natural effect with a perfect adherence to the support of aluminum/PVC composite material. The hand made layering gives to the surface an unconventional look, enhancing the beauty of the material and its natural multiple shades. Ecoresina panels are scratchproof and stain-resistant. Panelled version can be enriched with an emotional perimeter light, which creates an intimate and relaxing atmosphere in the room.

Mawi Spa 175/200

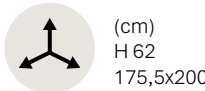

With its clean and minimal design, this 3-seater spa is also equipped with two waterfalls with integrated chromotherapy, for an all-round relaxation.

OF SPA

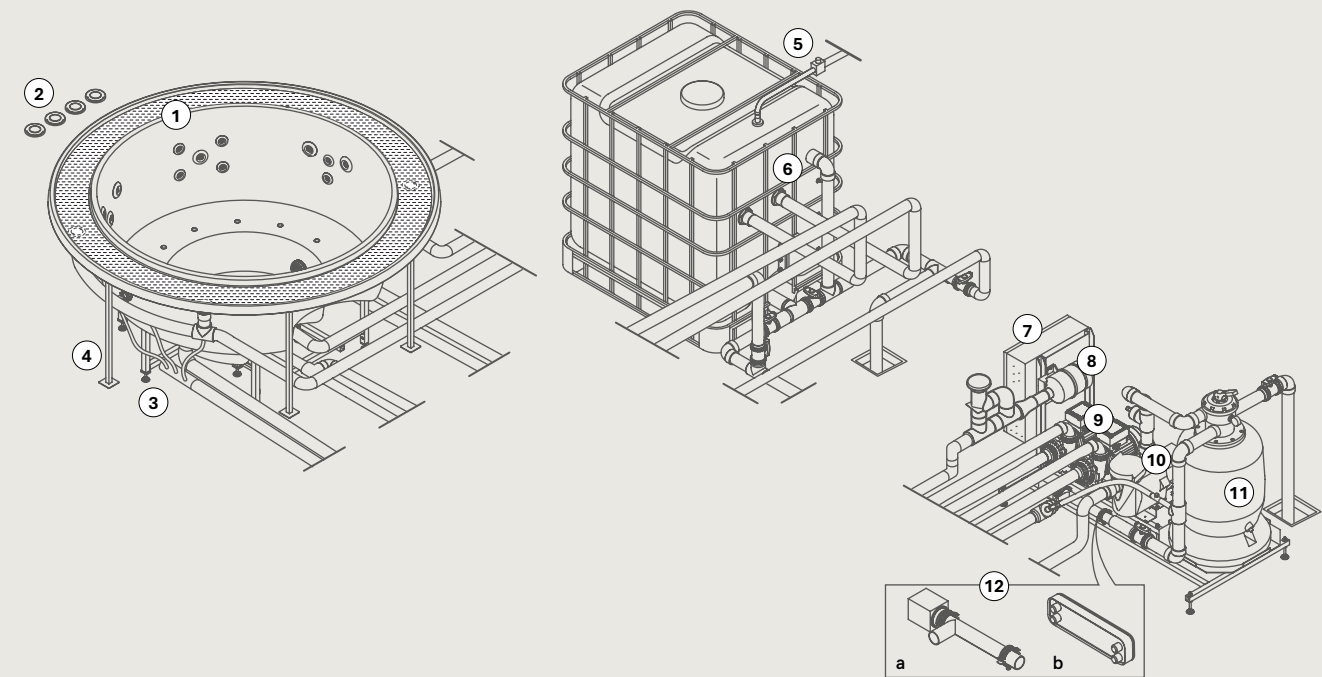

A unique experience.

It's like magic: as you let yourself enjoy the comforting embrace of water, your mind and body get regenerated. In this spa the water constantly flows over the rim of the pool, it overflows into the overflow channels and is conveyed to the balance tank.

The water is automatically topped up, using filtered water which is free of all impurities: all overflow spas are equipped with a sand filter, which ensures a superior quality filtration.

Overflow spa

OF Spa high quality standards make this product ideal for both domestic and professional use; the wellness experience is further enriched by chromotherapy with 8 colors and 4 preset programs. 4 pneumatic buttons make function control easy and intuitive.

A difference between Overflow Spa and Portable Spa is that the former is totally silent: the whole technical system (pumps, filter, balance tank) is installed in a special compartment located at a maximum distance of 6 meters from the spa.

The system includes:

- 1 - Spa-Pack, a technical equipment which includes an electric control unit, pumps, blower, heater or heat exchanger (optional) ozonizer and sand filter.
- 2 - Balance tank, which keeps the water level on the overflow of the spa, thanks to the top-up system.

The installation of the spa is made easier by some adjustable feet, which are installed both on the frame and on the Spa-Pack of the OF Spa.
