

## Press Release

Härkingen/Gunzgen, 15 April 2024

**RONAL Bathrooms is presenting its first four innovative modern bathroom concepts, that take new aesthetic and functional paths. The bathroom concept “Space” allows a perfect space management within a traditional bathroom area but also fits in other living spaces. All RONAL Bathrooms concepts will be unveiled by RONAL Bathrooms at the Salone del Mobile in Milan the 16 April.**

Saving space and living space - both is possible with this “Space” bathroom concept which shows how to optimize a bathroom solution, even if located in unconventional spaces, with a high-end solution where aesthetics and functionality coexist perfectly.

The bathroom furniture with reduced depth creates a boiserie solution that further highlights the space optimization and can also integrate daily functional areas. This new elegant boiserie concept in Ossidiana wood essence is optimally combined with the slim shower area in a coordinated colour scheme. The shower area is once again smart, comfortable and energy/water-saving sustainable.

“Space” allows a perfect space management within a traditional bathroom area but also fits in other living spaces, offering additional functional modules (laundry, wardrobe, storage...).

RONAL Bathrooms concept “Space”

## **RONAL Bathroom products within the bathroom concept “Space”**

**ALMAZA SPACE** from **KAROL**, a modular bathroom boiserie with reduced depth, which integrates the WC and washbasin areas and maximize the storage function; with complementary laundry, wardrobe and storage built-in columns.

The shower area is equipped with **KUDOS PINNACLE8** shower enclosures in combination with **KUDOS ULTIMATE** shower tray and **InSens** Pad-S shower system by **INMAN**.

- Almaza Space, bathroom furniture, KAROL

With Almaza Space it is possible to have a modular solution, where the bathroom space is managed as a "walk-in closet" with a functional boiserie with open or closed storage modules and reduced depth. There is also the possibility to have functional columns where the laundry and wardrobe areas can find space.

- Pinnacle8 shower enclosure, KUDOS

The stunning Pinnacle8 level access enclosures are frameless and will maximize both space and light in any bathroom. Removing the frame from the enclosure provides the end user with level access to their showering space, perfect for multi-generational households or those who are ‘future proofing’ their bathroom. Available in chrome, matt black and brushed brass finishes, Pinnacle8 level access enclosures are 200mm high and feature 8mm toughened safety glass throughout.

- Ultimate shower tray, KUDOS

Available in two contemporary slate effect finishes and in 18 sizes, this shower tray is easy to clean, is slip resistant and contains an anti-microbial additive which helps to inhibit the growth of bacteria.

- InSens, INMAN

The smart-shower concept InSens by INMAN combines comfort, design and respect for the environment. InSens reduces water consumption up to 70 percent and energy consumption up to 50 percent for every shower. The ideal temperature and amount of water can be conveniently set in advance using a digital pad or smartphone. The water consumption is displayed directly in real time on the LCD color screen while showering.

- Freestanding washbasin Catino, KAROL

Iconic freestanding washbasin Catino with Base in Cotto di Impruneta, a material that is closely linked to Tuscany, where the company is located, is matched with a Catino washbasin in Natural Stone, Bianco Carrara or Nero Marquina, two finishes that enhance the beauty of the product.

The RONAL bathroom concept “Space” and all other RONAL Bathrooms concepts will be presented by RONAL Bathrooms at the Salone del Mobile in Milan the 16 April, Hall 06, Stand D25.
