RONAL Bathrooms Collections 2025: Elegant Italian design with well thought-out modularity: The new RIGO furniture collection

With RIGO furniture collection from KAROL, RONAL Bathrooms presents a comprehensive furniture and washbasin program in elegant Italian design and well thought-out modularity.

The refined, 3D textured and plain furniture modules and the glossy Mineralmarmo tops and basins, each in a wide range of colour options, create unique design variants. They form the basis for an individual and modern bathroom design with characteristic details.

The RIGO furniture collection is completely modular:

- The washbasin cabinet is available in various sizes, alternatively with plain or 3D textured fronts and with one or two drawers. There is a wide colour choice: six tactile colours from the RIGO colour palette, all 27 KAROL lacquered colours or any RAL colour can be chosen.
- Extra storage space can be added with base cabinet, with same sizes and finishes as the washbasin cabinet.
- A shaped top with a raised edge extending both on the front and on the back is available as characteristic feature of the RIGO collection: More than just an elegant detail, this thoughtful design prevents spills, safeguarding the cabinet from daily wear. A perfect harmony of style and functionality.
The RIGO top can be chosen with integrated or countertop washbasin, both in glossy Mineralmarmo. The countertop washbasin is available in round and oval version.
- Whether integrated or countertop washbasin, in both versions the handle of the furniture has the same colour as the worktop and washbasin, creating a harmonious look.
- As optional, RIGO collection offers various columns, again in a choice of 3D textured or plain finishes. In the column H1700 mm the door is divided in two parts so that the upper door can be plain and the lower door textured.
- Finally, the furniture composition can be completed with one of the new mirrors from the RIGO collection. Further accessories are available.

The modularity of the RIGO concept offers a wide range of design options as well as the ability to expand at a later date to meet the changing needs of individual bathroom environments.

The furniture systems also serve as a connecting element between the living room, bedroom and bathroom.
